### REAL ESTATE PLATFORM

It is a web-based platform that allows buyers and sellers to work directly, online, without involving any real estate agents in the buying and selling chain. Using this platform, a seller can direct a buyer to their property profile. On each profile, a buyer can easily submit an offer for the property on sale. Also, it allows both users to chat and easily negotiate the property on sale without any hassle. Moreover, users can even create and sign the contract right on the platform.

**Technology Stack:** ReactJS, HTML, CSS, SASS, JSON, Twilio, DocuSign, NPM, Bootstrap, Amazon EC2, AWS S3

### POSTPAID SALES SERVICE APP

It is a web-based app that allows vendors to sell their products and services with on-ground sales support. It helps the user in saving by using the best offer of Cashback/Reward right on the platform. It also allows vendors to cross-sell each other's products & services, without actually investing in any type of inventory. Using this platform, one can easily recharge a mobile, book a flight, check nearby stores for offers, check brands, visit shopping websites, buy insurance, etc.

**Technology Stack:** ReactJS, NextJS, Redux, HTML, CSS, SASS, NPM, Bootstrap, Amazon EC2, AWS S3, Stripe

### NETWORK SECURE

it is an SSL VPN used by various organizations across different kinds of industries. It ensures a single unified client for remote and on-site access. It has powerful multi-factor authentication along with easy integration with services like directory services and identity services.

**Technology Stack:** ReactJS, Redux, HTML, CSS, SASS, Microfrontends and Monorepos, Unit Testing
